How: Project Approach Overview

WHERE ARE WE NOW?

Nashua School District, in partnership with Harriman Architects & Engineers, has completed the initial, crucial data-gathering and community input phase for the Facilities Master Plan. This process is focused on addressing the immediate, 10-year, and long-term capital needs of Nashua's aging school facilities with a proactive, sustainable, and cost-effective solution that creates warm, safe, and welcoming buildings that support our current and future students' basic educational needs for future-ready teaching and learning.

WHAT HAS BEEN COMPLETED?

Kick-off Meeting and regular Advisory Committee meetings: These meetings established the goals of the project and provided feedback and input throughout the process.

Facilities & Site Condition Assessment: Harriman conducted a thorough audit of 19 district buildings, identifying critical needs (0-3 years) and long-term capital improvement needs (3-10 years), and identified that an estimated \$144.8M +/- in total repairs are needed across the district over the next decade.

How: Project Approach Overview

WHAT HAS BEEN COMPLETED?

Capacity, Utilization and Program Needs Analysis: In meetings with school leaders and through the educational visioning process, programmatic deficiencies were identified in many of the District’s buildings, such as a need for additional or larger program and specialist spaces, collaboration spaces, and improvements to safety & security.

Enrollment Projections: Harriman reviewed the Demographic Study Report completed by New England School Development Council (NESDEC), dated September 11, 2025. The projection numbers indicate K-12 enrollment trending down, looking out to the 2034-35 school year.

Community Engagement: We have hosted two public forums so far. Attendees of the first forum learned about the findings of the facilities assessment and participated in an interactive exercise to come up with the project “Design Statement.” The second forum introduced the various options being considered and asked for public feedback on the options.

How: Project Approach Overview

WHAT IS NEXT?

Determine which option is the best long-term solution for the district...

Continued Community Engagement: As leadership narrows down the options further, we will encourage the community to provide feedback to help inform the ultimate selected option.

Determine Supported Option: Determine the option that best supports the long-term goals of the district and the communities it serves.

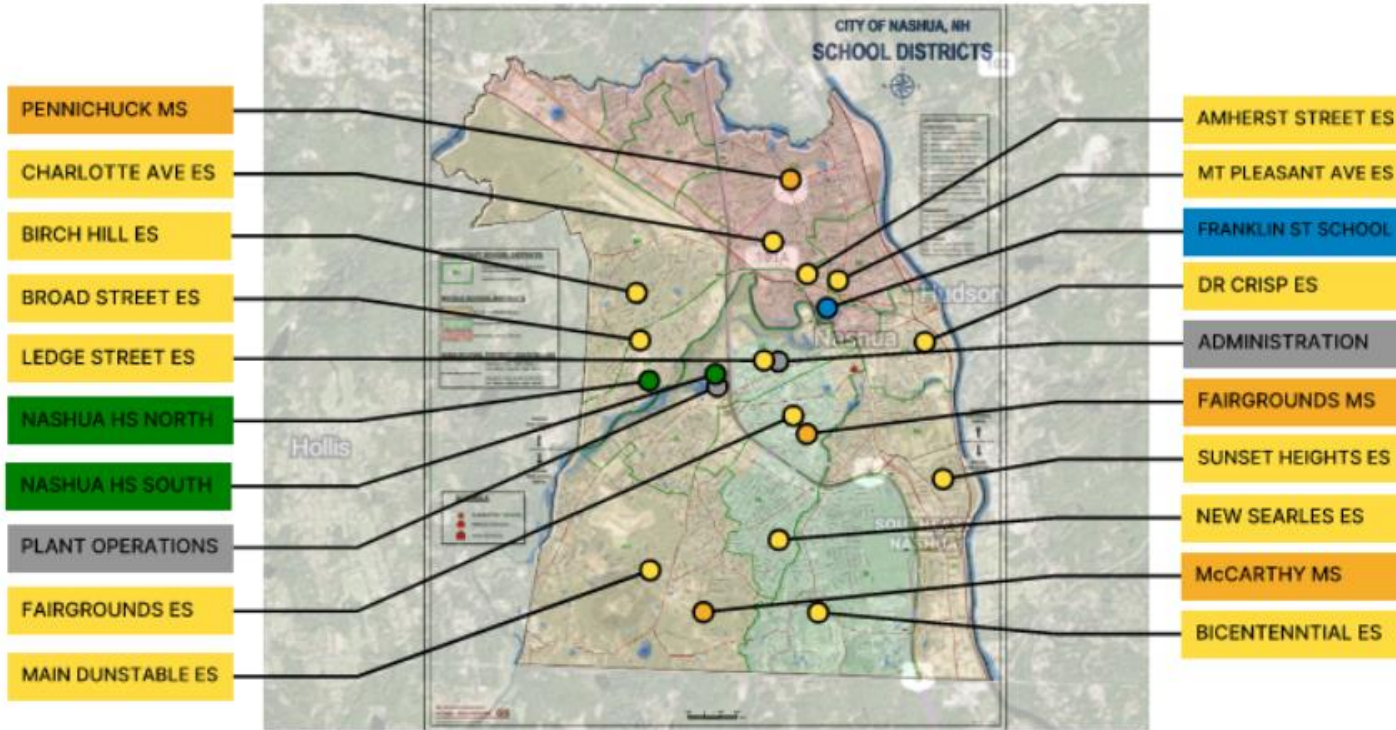

Complete the Master Plan: Determine immediate, near-term, and long-term steps to achieve the overall vision. Develop conceptual plans as necessary for any projects and/or referendums.

What: Data Collection

Ages of Existing Facilities

(*At Time of Facilities Study – 2025)

The following table identifies the building age for each of the facilities assessed:

FACILITY NAME	YEAR BUILT
Administration Building	1991 (34 Years Old)
Amherst Street ES	1892 ['64, '78, '99] (133 Years Old)
Bicentennial ES	1977 ['97] (48 Years Old)
Birch Hill ES	1972 ['93, '25] (53 Years Old)
Broad Street ES	1963 ['65, '90, '15] (62 Years Old)
Charlotte Ave ES	1954 ['90, '13] (71 Years Old)
Dr. Crisp ES	1981 ['97] (44 Years Old)
Fairgrounds ES	1954 ['64, '90, '12] (71 Years Old)
Fairgrounds MS	1961 ['96, '21] (64 Years Old)
Franklin Street	1970 ['22] (55 Years Old)
Ledge Street ES	1957 ['65, '90, '12] (68 Years Old)
Main Dunstable ES	1972 ['93, '25] (53 Years Old)
McCarthy MS	2024 (1 Year Old)
Mt. Pleasant ES	1925 ['87, '00] (100 Years Old)
Nashua HS - North	2002 (23 Years Old)
Nashua HS - South	1975 ['03, '04] (50 Years Old)
New Searles ES	1968 ['95, '03] (57 Years Old)
Pennichuck MS	1988 ['99, '01, '22] (37 Years Old)
Sunset Heights ES	1965 ['90, '16] (60 Years Old)

As discussed in U.S. Department of Education, National Center for Education Statistics (1999) – “...According to Ornstein (1994), when a school is

- **20 to 30** years old, **frequent replacement of equipment** is needed.
- Between **30 and 40** years old, the **original equipment should have been replaced**, including the roof and electrical equipment.
- After **40** years, a school building begins **rapid deterioration**, and after **60** years most schools are abandoned.”

Assessment of Facilities Conditions: Facility Condition Matrix

This matrix provides an overall system condition assessment for all your district's schools.

Specific items in each system can be found within the details of the report. This matrix serves to compare one school's condition to the next.

Takeaways:

Charlotte Avenue ES, New Searles ES are the schools that currently have the highest EUIs. *(Lower EUI = Better Efficiency)*

Charlotte Avenue ES, Franklin Street School, Fairgrounds MS, New Searles, & Amherst Street ES are the schools with the highest energy cost/SF.

Some of the **older systems** may not meet current code requirement for ventilation, therefore **requiring less energy to operate** than those that do.

McCarthy MS is N/A as it was recently completed. Data based on 3 of years of utility bills.

*****Per the National Center for Educational Statistics (NCES): "Enrollment capacity is calculated differently for different types of schools... In a high school, both basic classrooms and specialty instructional spaces (such as art or music rooms) are counted toward capacity because regular classrooms are not left unoccupied while students get art or music instruction... Thus the formula for determining secondary school capacity is the sum of capacity for each type and number of classrooms multiplied by an optimal utilization rate, which may range from 75 percent to 90 percent." The 75% utilization factor provides the greatest flexibility in scheduling for these cohorts, in our conclusion, but the district should look at other utilization factors to see how they work with their scheduling. (See the Capacity Study for more).*

Key Takeaways:

Elementary Schools are currently operating under capacity (approx. 78% utilization). **High Schools** are currently operating at capacity (approx. 99% utilized). **Highest enrollment for both cohorts** is projected for school year 2026/27, then trends downward through 2034/35.

The **Middle Schools** are currently operating under capacity (approx. 80% utilization). **Highest enrollment** is projected for school year 2029/30, then trends downward through 2034/35.

Elementary & High Schools have already seen their **highest enrollment**, according to the enrollment projections.

Programming: Educational Visioning—Key Recommendations for Design

1. DESIGN FOR SAFETY, SECURITY, AND WELCOME

Ensure secure building entry points and interior layouts that promote both safety and a welcoming atmosphere for students, families, and the broader community. Include clear wayfinding, natural light, and calming design features.

2. INTEGRATE UNIVERSAL DESIGN & ACCESSIBILITY

Embed principles of Universal Design across all facilities to ensure inclusive barrier-free environments for all students and community users, regardless of ability.

3. CREATE AGILE, FLEXIBLE LEARNING NEIGHBORHOODS

Develop clusters of classrooms and learning spaces that support differentiated instruction, team teaching, and seamless transitions between individual and personalized instruction.

4. INCORPORATE SUSTAINABLE & HEALTHY BUILDING PRACTICES

Prioritize energy-efficient systems, natural lighting, clean air circulation, and sustainable materials to create environmentally responsible, wellness supportive learning environments.

5. ENHANCE TECHNOLOGY INTEGRATION ACROSS ALL LEARNING SPACES

Ensure robust digital infrastructure and ubiquitous access to devices and interactive tools, with tech-rich environments such as media centers, learning commons, and classroom tech integration.

Programming: Educational Visioning—Key Recommendations for Design

6. PROVIDE HANDS-ON MAKERSPACES & APPLIED LEARNING LABS

Establish dedicated spaces for experiential, project-based learning that support real-world readiness through STEM, arts, and career technical education (CTE) programs.

7. DEVELOP INDOOR & OUTDOOR MOVEMENT & WELLNESS SPACES

Include fitness zones, walking paths, active play areas, and flexible outdoor learning environments that support physical activity, recreation, and social-emotional wellbeing.

8. SUPPORT COLLABORATION & PROFESSIONAL LEARNING

Provide dedicated teacher collaboration zones and professional work areas that enable team planning, interdisciplinary instruction, and ongoing educator development.

9. DESIGN CAFETORIUM & MULTI-PURPOSE GATHERING AREAS

Integrate flexible, large-capacity spaces that can be used for dining, performances, assemblies, and community events—enhancing educational programming and public engagement.

10. ENABLE AFTER-HOURS AND COMMUNITY USE

Strategically design zones within schools that can operate independently after hours, such as gyms, art spaces, meeting rooms, and wellness centers, to support community access, events, and lifelong learning.

Programming: Educational Program Descriptions—Elementary School

1. EDUCATIONAL PHILOSOPHY & PROGRAM MODEL

Nashua School District's elementary schools focus on developing the whole child through a nurturing, inclusive, and student-centered approach. Instruction emphasizes foundational literacy, numeracy, social emotional growth, and inquiry-based learning. Teachers employ differentiated instruction to meet a wide range of learning needs, and early intervention supports ensure all students develop the essential skills for lifelong success.

2. CORE ACADEMIC & SPECIALIST SPACES

Elementary schools feature classrooms organized by grade level, supported by shared resource areas for reading and math intervention, English language learner support, and special education services. Specialist areas include art, music, world language, library/media centers, and physical education spaces designed to promote creativity, expression, and active learning.

3. EXTENDED LEARNING, MAKER, AND STEAM AREAS

To cultivate curiosity and innovation, many schools incorporate dedicated or flexible spaces for hands-on exploration and design, including maker spaces, science labs, and technology-rich STEAM environments. These areas support project-based learning, cross-disciplinary exploration, and early exposure to scientific and engineering concepts.

4. OUTDOOR LEARNING & PLAY ENVIRONMENTS

Each elementary campus provides safe, engaging outdoor play areas that encourage physical activity, imagination, and social interaction. Outdoor classrooms and natural learning areas are increasingly integrated to support environmental education, wellness, and experiential learning opportunities.

Programming: Educational Program Descriptions—Middle School

1. INTERDISCIPLINARY TEAMING & LEARNING COMMUNITIES

Middle Schools in NSD are organized around the interdisciplinary team model, creating smaller learning communities within the larger school environment. Each team includes core academic teachers—English language arts, mathematics, science, and social studies—who collaborate to integrate curriculum, support students' social emotional development, and strengthen relationships.

2. FLEXIBLE CLASSROOMS & COLLABORATION SPACES

Learning areas are designed for flexibility and collaboration, allowing for varied group sizes, interdisciplinary projects, and technology-supported learning. Team centers, small group breakout rooms, and extended learning areas provide space for peer-to-peer collaboration, teacher planning, and student support.

3. SCIENCE, TECHNOLOGY, AND ARTS INTEGRATION

Middle School programs emphasize active, exploratory learning across disciplines. Robust science labs, technology and engineering spaces, and arts classrooms support creative expression and problem solving. Co-curricular opportunities in robotics, coding, performing arts, and visual design complement the core program and help students discover emerging interests and talents.

Programming: Educational Program Descriptions—High School

1. ACADEMIC CLUSTERS, CTE PROGRAMS, AND SPECIALIZED LABS

NSD's two comprehensive high schools (Nashua High School North and Nashua High School South) offer a broad array of academic programs, career pathways, and specialized learning environments. The Nashua Technology Center (NTC), co-located on both campuses, provides 16 Career and Technical Education (CTE) programs in high-demand fields such as Advanced Manufacturing, Biotechnology, Cybersecurity, Construction, and Culinary Arts. These programs feature industry-grade labs, studios, and equipment that support authentic, applied learning.

2. CAREER PATHWAYS, DUAL ENROLLMENT, AND PROJECT-BASED LEARNING

High school students engage in personalized pathways that align academic study with future goals. Dual-enrollment partnerships allow students to earn college credits while in high school, and project-based learning experiences connect classroom instruction to real-world application. Work-based learning, internships, and credentialing opportunities prepare graduates for college, careers, and civic life.

Programming: Educational Program Descriptions—District-wide/Specialty

1. SPECIAL EDUCATION & STUDENT SERVICES

The district provides a full continuum of special education services across all grade levels, including inclusion classrooms, resource programs, and therapeutic supports. Student Services teams—comprising special educators, counselors, psychologists, and related service providers—work collaboratively to ensure each student’s individual needs are met in the least restrictive environment.

2. EARLY CHILDHOOD & PRE-K

NSD’s early childhood programs emphasize readiness for learning through play-based, developmentally appropriate instruction. Pre-K classrooms promote social, emotional, and cognitive growth while supporting early literacy and numeracy skills. Programs are designed to engage families as partners in their children’s learning and development.

3. ALTERNATIVE & THERAPEUTIC PROGRAMS

The district offers alternative and therapeutic programs that provide personalized, supportive environments for students who benefit from non-traditional learning settings. These programs address academic, behavioral, and emotional needs through small-group instruction, counseling, and individualized plans that build confidence and re-engage students in their learning.

4. ADULT EDUCATION & COMMUNITY USE

Each elementary campus provides safe, engaging outdoor play areas that encourage physical activity, imagination, and social interaction. Outdoor classrooms and natural learning areas are increasingly integrated to support environmental education, wellness, and experiential learning opportunities.

Programming: Educational Visioning—Building Design Requirements

1. LEARNING COMMONS & COLLABORATION HUBS

Nashua School District envisions Learning Commons and Collaboration Hubs as dynamic, flexible, and technology-rich spaces that serve as central nodes for student engagement and interdisciplinary learning. These areas must support varied instructional approaches, from independent study to group projects, by incorporating modular furniture, writable surfaces, and seamless access to digital resources. Designed to foster creativity, critical thinking, and collaboration. Learning Commons should be centrally located and visually connected to adjacent learning neighborhoods, encouraging spontaneous interaction among students and staff while also providing quiet zones for focused work.

2. CLASSROOM NEIGHBORHOODS & FLEXIBLE CLUSTERS

Classroom Neighborhoods and Flexible Clusters are foundational to Nashua's commitment to personalized and student-centered education. These clusters should be organized as adaptable groups of classrooms and shared breakout spaces that promote small community building and flexible scheduling. Design requirements emphasize movable partitions, multi-use rooms, and scalable technology to accommodate diverse learning styles and group sizes. Each neighborhood must foster a sense of belonging and autonomy while enabling teachers to collaborate and students to transition fluidly between whole-group, small-group, and individual learning modes.

Programming: Educational Visioning—Building Design Requirements

3. SUPPORT SPACES (ADMINISTRATION, COUNSELING, HEALTH, CUSTODIAL)

Support Spaces within Nashua schools are critical for maintaining a safe, nurturing, and efficient educational environment. Administrative areas should be welcoming and secure, facilitating smooth communication between families, staff, and visitors. Counseling and health suites must prioritize privacy and accessibility, with spaces that accommodate confidential meetings and health services essential to student well-being. Custodial support areas should be strategically located for efficient maintenance operations without disrupting learning spaces. Overall, these support zones require thoughtful layout and durable finishes to enhance operational effectiveness while contributing to the school's positive climate.

4. DINING, KITCHEN, AND MULTIPURPOSE

Dining, Kitchen, and Multipurpose Areas are envisioned as versatile hubs supporting nutrition, socialization, and community gatherings. Nashua's design philosophy calls for large, flexible dining spaces that accommodate diverse student populations, including considerations for special dietary needs and cultural inclusivity. Kitchens must be designed for efficiency and adaptability to evolving food service standards, supporting both large-scale meal production and smaller community events. Multipurpose rooms integrated with dining facilities provide opportunities for assemblies, performances, and recreational activities, reinforcing the school's role as a vibrant community center.

Programming: Educational Visioning—Building Design Requirements

5. TECHNOLOGY & INFRASTRUCTURE REQUIREMENTS

Nashua School District prioritizes robust technology infrastructure as the backbone of contemporary education. Building design must incorporate high-capacity wired and wireless networks, strategically placed power and data outlets, and dedicated spaces for technology equipment and support staff. Infrastructure should enable seamless integration of devices, interactive displays, and virtual learning platforms while ensuring cybersecurity and data privacy. Flexibility for future technology upgrades is essential, requiring scalable systems and conduit pathways to support rapid innovation and the evolving needs of both students and educators.

6. ACOUSTICS, LIGHTING, AND INDOOR AIR QUALITY STANDARDS

Optimal learning environments in Nashua schools depend on carefully engineered acoustics, lighting, and indoor air quality. Acoustic design must minimize noise transfer between classrooms and common areas through sound-absorbing materials, strategic spatial planning, and controlled mechanical systems. Lighting systems should maximize natural daylight while reducing glare, supplemented by energy-efficient LED fixtures with adjustable controls to accommodate various instructional activities. Indoor air quality is paramount; ventilation systems must meet or exceed current standards to provide fresh, filtered air that supports student health, cognitive function, and comfort, with monitoring systems integrated to maintain continuous environmental quality.

CONSIDERATIONS:

- Operation of 12 Elementary Schools
- Elementary Schools are generally underutilized
- Ages of schools vary; recent renovations for the schools vary
- The schools are spread around the city. In some cases, some buildings are in close proximity, and others are not.
- Building repair costs only are estimated at \$94,488,149 for 2025. This does not consider program needs.

Cost Saving Examples

4

Cost Saving Examples

For Each school that closes it equates to approximately \$1.6 to 1.8M in operational savings per year. This can vary based on which schools are closed. *Approximate cost savings provided by the district (plant ops, wages, benefits, etc.)*

\$1.6-\$1.8M / Year in cost savings or \$32 - \$36M over 20 years**

\$3.2-\$3.6M / Year in cost savings* or \$64 - \$72M over 20 years**.

\$6.4-\$7.2M / Year in cost savings* or \$128 - \$144M over 20 years**.

\$8-\$9M / Year in cost savings* or \$160 - \$180M over 20 years**.

* If new schools are built as part of an option there will be cost savings due to reduced operational (fewer buildings / less square footage can equate to less utilities and staffing) but the savings will most likely be less than what is illustrated above. Once we narrow the option down to less than 3 more detailed cost savings projections can be provided.

** 20 years is a typical duration of a project bond.
